The following step-by-step guide was developed to assist you in enabling the Two-Factor Authentication in your First Tech Online Banking. You can also contact us at 855.855.8805.

1) Log in to the First Tech Online Banking and click on the dropdown menu under your name to select “Settings”:
2) Choose the “Security” tab in “Settings”:
3) Move the toggle to “ON” to require Two-Factor Authentication for each login.
4) Next time when you log into Online Banking, you'll be prompted to enter a random 6-digit code generated by your choice of channel, an email, a text message, or a phone call, in addition to your user name and password. Just enter that code, and you’re ready to go! Find out more on how to set up “tokens” [here](#).
